

## Notes:

Elton Jeff & The Honky Cats uses their own X32 rack and split snake, and their own in-ear monitor systems. Occasionally, they bring their own FOH engineer who receives the whip, runs his own console backstage, and mixes remotely via our own Wi-Fi. In this case, our engineer will send house engineer left, right and sub signals from his back stage console (off stage left, preferred). Power is required at the rear of stage left, the rears of stage right, down stage center, and backstage near the console. If a house system is provided, we only require two powered stage monitors (for horns and piano) and six microphone stands with standard clips.

X32 Rack/Floor Box

Andy Sutton  
*Drums*

Platform Preferred

Kyle Brooks  
*Saxophone*

Dan Cummins  
*Trumpet*

Chris Linstrot  
*Trombone*

Platform Preferred
