| 8 Overhead 2 | 16 Cntr Acoustic Gtr | 24 Stg L Vocal | 32 God Mic |

The venue will provide quality microphones, stands and cabling to accommodate the above input list, (Shure, Sennheiser, etc) and will provide a quality front-of-house system, adequate power sources and stage lighting.

We will carry in-ear monitor transmitters and receivers with us. We will also carry a splitter snake with us and provide the house engineer with a whip. If we have an engineer with us, we will just send the left/right to FOH. A soundcheck is required with the house engineer or our engineer and will not be limited in time. Doors will be held until soundcheck is complete.
